

Ivann H. KAMDEM POUOKAM

9 Boulevard des Maréchaux, 91120 Palaiseau – France

☎ +33 6 05 95 77 85 • ✉ ivann.kamdem-pouokam@polytechnique.edu

🌐 [linkedin.com/in/ivann-kamdem](https://www.linkedin.com/in/ivann-kamdem)

Applied Mathematics & AI student at École Polytechnique, focused on statistical learning, generative modeling, and high-dimensional data analysis. Seeking a research internship from March 22, 2027 (16 weeks minimum).

Education

École Polytechnique

Palaiseau, France

2024–Present

- Applied Mathematics & Computer Science track (Machine Learning, Statistics, Database Systems)
- Working toward a Master's-level engineering degree (expected 2028)

National Advanced School of Engineering of Yaoundé

Cameroon

2021–2024

- Leading engineering school in Cameroon
- 2 years common core in Mathematics, Physics, IT (ranked 2nd/400)
- 1 year specialization in Computer Engineering (ranked 1st/94)

Professional Experience

Image Research Internship, Assisted Image Culling

DxO, Boulogne-Billancourt

Jun 2026–Aug 2026

- Formulated a rotation-invariant PCA geometric model on landmark covariance spectra & trained a CNN classifier, reaching macro-F₁ 0.93 on unconstrained test sets
- Modeled continuous blur fields via variational energy minimization and luminance-guided diffusion across 4,728 provenance-balanced images, auditing multi-source biases with NMI and metadata cheater baselines (macro-F₁ 0.86)

Scientific Research Project (PSC), AI & Supply Chain

Lokad, France

Sep 2025–May 2026

- Developed an intelligent assistant for Supply Chain Scientists to navigate large-scale enterprise DSLs
- Architected a modular RAG pipeline (AST parsing, semantic chunking, dense embeddings, deterministic evaluation benchmarks) for complex codebases

IPAI Foundation Hackathon, "Rethink Education"

Heilbronn, Germany

Mar 2026

- Selected as one of the top teams from HI! PARIS to compete in an international 50h AI-in-Education hackathon
- Built "Sapient.AI", an autonomous agent platform unifying communication channels into structured timelines, awarded 3rd prize out of 10 teams

HI! PARIS, AI & Data Science Hackathon

Palaiseau, France

Nov 2025

- Tackled two real-world challenges in 48h: large-scale regression on 1M dataset & gamified ed-tech platform
- Awarded the **Best Scientific Approach Award** for rigorous predictive modeling methodology

Technical Skills

- **Statistical learning & AI:** high-dimensional data analysis, generative models (VAEs, diffusion), deep learning, statistical audits (NMI, MCC)
- **Systems & tooling:** automated testing, reproducible scientific pipelines, Linux environments, Docker, Git
- **Programming & scientific stack:** Python (PyTorch, NumPy, SciPy, Pandas), Java, C, Bash scripting

Extracurriculars & Awards

- **Network & Infrastructure Student Club:** Exploring agentic systems, network architectures and virtualization.
- **Awards:** 3rd prize (IPAI Hackathon 2026), Best Scientific Approach (HI! PARIS 2025), ZTF Laureate (2023, 2021), Nat. Math Olympiad Winner (2021), Bronze (OFM 2021)
- **Interests:** Recreational cycling, Piano (self-taught), Badminton
